

# DeWitt County

Project Profile State: Illinois

## DeWitt County

**Area:** 405 sq. miles

**Parcels:** 10,753

**Population:** 16,561

**Density:** 42/sq. mi  
\*as of 2010 census

## Assessment

- DeWitt County needed an updated re-flight due to ten years passing since their last flyover.

## Solution

*The county will receive the following from Sidwell:*

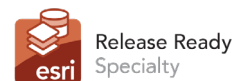

- Natural color digital capture aerial photography
- Project-wide half-foot resolution orthophotography
- Assistance in remote installation of orthophotography
- Set of color map book pages

## Impact

- DeWitt County can now find buildings that have been demolished or moved, as well as newly constructed buildings in new subdivisions.
- The up-to-date flight can be accessed for all users online.

**"DeWitt County is looking forward to the re-flight because it has been over 10 years since the last flight.** This will assist DeWitt County in finding omitted buildings, show the occupation in the new subdivisions with the newly constructed buildings and create an up to date flight for users on the internet."

*- Sandy Schlosser, DeWitt County, IL, Supervisor of Assessment*
