Esri® Implementations

Sidwell
A Division of HARRIS

Sidwell can assist you with projects ranging from Esri solution implementation to system-wide upgrades with packages designed for the following:

ArcGIS® Hub

Engage your community with a public access template that organizes people, data, and tools through the use of ArcGIS Hub Basic or Premium.

Establish ArcGIS Hub in 3 Easy Steps with our Service Bundle:

✔ **Consultation and Project Planning**

✔ **Installation and Configuration**

✔ **Training**

ArcGIS® Enterprise

Take advantage of additional capabilities, products, and applications by expanding your current Esri technology to ArcGIS Enterprise.

✔ **Centralize your GIS environment**

✔ **Control how and when you share non-GIS content and GIS data**

✔ **Safely create and share data internally, guarded by your network.**

ArcGIS® Pro

Seamlessly support data visualization, advanced analysis, and authoritative data maintenance in both 2D and 3D with ArcGIS Pro.

✔ **Package projects, maps, or layers in a few clicks and share via ArcGIS Online, ArcGIS Enterprise, or a file.**

✔ **Enjoy a better user experience with modeless panes that allow you to interact with the application while running a tool.**

ArcGIS® Online

Empower your users with GIS data that can be used online and in the field with ArcGIS Online.

✔ **Easily create, publish, and share your GIS data.**

✔ **Update your web presence with customized web maps, applications, and templates to fit your needs.**

✔ **Create targeted maps and solutions to aid your organization and end-users**
